

VEHICLE JAMMERS

The main Objective of the Vehicle Jammer is to shield from any attempt of attack by using Improvised Explosive Device, blocking all cellular communication.

Key features:

- Vehicle Mounted System for Convoy and VIP Protection
- Blocking wide range of RCIED (Remote Control Improvised Explosive Devices) receivers using broadband transmitting equipment
- Ultra Wide frequency coverage (800-2200) MHz
- Various modulation types jamming capability
- Easy Intuitive Operation
- VSWR & Thermal protection
- Overheat protection: 75 °C cut-off operation, 71 °C resume of operation
- Antennas: Single Tactical Antenna
- Power Consumption 25A at 24VDC, typical
- Weight: approx. 40kg
- Kit-set system integration
- Optional: A Selective operation for each band
Intelligence gathering by various methods

Applications:

Presidential Guard
VIP Protection
Convoy Protection
